WORK EXPERIENCE

Colorado Legislative Council — Oct 2022 – Present

Associate Application Developer → Application Developer

- Developed and maintained mission-critical web applications for the Colorado State Legislature, streamlining legislative workflows and reducing third-party costs. Key accomplishments include:
  - Implemented a rich text editor with version history, improving document creation efficiency for legislative staff.
  - Automated generation of the Colorado Revised Statutes for on-demand access and faster legal review. (Apache POI & iText7)
  - Replaced a legacy Microsoft Access system for the Joint Budget Committee, enabling annual state budget creation and management through a modern interface (React & Java Spring).
- Appointed by leadership to spearhead organization-wide CI/CD automation for Java/Spring and Rails stacks, while managing end-to-end infrastructure, database migrations, and DevOps tooling (Jenkins, Artifactory, Docker, Bitbucket).

Cognizant — June 2021 – Oct 2022

Associate Full-Stack Developer

- Designed interactive retail sales prototypes that increased client engagement and secured executive buy-in with international teams in India and the Netherlands.
- Built a virtual try-on e-commerce application using MediaPipe and Three.js, integrating WebXR, D3 visualizations, and NFC/GeoTech capabilities.

EDUCATION

Arizona State University

- M.S.E. in Software Engineering, cum laude. — August 2023 – May 2026.
- B.S. in Software Engineering, cum laude. — August 2017 – May 2021.

PROJECT

Orchestrating Autonomous Systems and Their Visualization

- Built a community-driven framework to overcome proprietary barriers and support trusted public autonomous deployment.
  - Simulated scalable autonomous swarms in Rust with data integrity, mission replay, and high-frequency fleet management.
  - Integrated Cesium.js and Three.js for real-time object detection and live vehicle animation.
  - Implemented schema evolution support to reduce refactoring across environments.
  - Reduced operator training and deployment overhead by simplifying software complexity.

TECHNOLOGIES

Java Spring, JavaScript/TypeScript, React, Jenkins, Artifactory, Docker, REST
